LIXIL Product Safety Principles

Innovation
•Build a global top level system in the field of product safety
·Work to develop innovative safety technology in the pursuit of total safety

Sustainability
•Collect state-of-the-art product safety information, and always strive to improve product safety activities
·Build a network of business partners and customers in order to secure safety across the entire product life-cycle

Integrity
•Work honestly and sincerely on product safety activities in order to obtain the trust of each and every customer
·Promptly disclose clear product safety information, with customers' safety and peace of mind as our top priority
